

INDEX TO VOLUME 10

Author Index

- AIRD, R.J. *Paper on 'Reliability of mechanical process plant'*, 3-6
- ALSTON, K. *Paper on 'Automated inspection techniques for quality control of packaging components'*, 45-47, 51
- BALL, L.W. *Paper on 'The relevance of industrial quality assurance to hospital quality assurance'*, 84-87
- BISHOP, M.T.J. *Discussion on 'The impact of new technology on QA standards'*, 22
- BUYERS, R. *Paper on 'The structure and form of a document business management programme'*, 75-82
- CHAKRABORTY, S. *Author's reply to discussion on 'Quality circles: their prospects in India'*, 22
- CORDREY, C. *Paper on 'Security and quality in the pharmaceutical industry: the supplier and the audit'*, 88-92
- DEAN, P. *Paper on 'Measurement — a key to quality' (Ninth John Loxham Lecture)*, 55-65
- DE BURIATTE, H. *Paper on 'The quality assurance approach to higher yields and performance in semi-conductors'*, 66-70
- EVANS, J.M. *Paper on 'Introducing computer-based technology to an organization'*, 48-51
- FRAGNE, P. *Paper on 'Using computers for quality improvement at workshop level'*, 31-35
- GILMORE, H.L. *Paper on 'Corporate concern for the quality of employee performance: company practice and interpersonal relations'*, 71-74
- HANSEN, W. *Paper on 'Quality and competition'*, 115-117
- KUMRU, MESUT *Paper on 'A quality performance evaluation system for a multi-product, multi-factory corporation'*, 112-114
- LIBRE, E. *Paper on 'Using computers for quality improvement at workshop level'*, 31-35
- McROBB, R.M. *Paper on 'A total computer-controlled gauge system for the future'*, 41-44
- MARCH, N.J. *Paper on 'Automated inspection techniques for quality control of packaging components'*, 45-47, 51
- MILLS, C.A. *Paper on 'Cost-effective quality assurance'*, 106-108
- MONK, J.K. *Paper on 'The selection and training of supplier assessors'*, 99-105
- OAKLAND, J.S. *Paper on 'Factors in the development of computers for quality control'*, 27-29, 51
- O'CONNOR, P.D.T. *Paper on 'Computer programs for design safety, reliability and maintainability analysis'*, 36-40
- OLDFIELD, R. *Paper on 'Problems in the fitting of taper threads'*, 17-21
- OPDEBEECK, E.J. *Paper on 'Factors in the development of computers for quality control'*, 27-29, 51
- PESOTCHINSKY, L.L. *Paper on 'Inspection of related variables'*, 9-11
- RATCLIFFE, T.H. *Paper on 'Quality assurance in seed production'*, 12-16
- REES, R.A. *Paper on 'Randomness in reliability'*, 7-8
- RODRIGUEZ-ESQUEDRO, P.J. *Paper on 'Inspection of related variables'*, 9-11
- ROWLEY, W.R.C. *Paper on 'From polar quadrant to the speed of light'*, 83, 87
- SAYLE, A.J. *Author's reply to discussion on 'The impact of new technology on QA standards'*, 22
- SCHURMAN, F.J.H. *Paper on 'The selection of suppliers'*, 95-98
- TAIT, M.J. *Paper on 'Security and quality in the pharmaceutical industry: the supplier and the audit'*, 88-92
- TILLEY, B.G. *Paper on 'Getting results with effective quality auditing'*, 109-111
- UDPA, S.R. *Discussion on 'Quality circles: their prospects in India'*, 22
- VAN OMME, N. *Paper on 'How to construct the locomotive to pull the train named "Quality"'*, 118-119

Subject Index

- Acceptance limits 9
- American Petroleum Institute (API) 19, 20
 - Master gauges 21
- AQAP 96, 99, 106, 119
- 'Artificial intelligence' programs 8
- Audit, of quality assurance programmes 79
 - See also* Vendor assessment programme
- Automated assembly of semiconductors 70
- Automated component handling 45
- Automated ordering function for new gauges 41
- Automated testing 46
- Automatic Scale Measuring Interferometer (ASMI) 83

- BDH Chemicals Ltd 63
- Bivariate distribution 10, 11
- Block Diagram Analysis (BDA) 36, 39
- British Aerospace 40
- British Calibration Service 58, 59
- British Ceramic Research Association 64
- British Gas Corporation 100
- British National Measurement System. *See under* National Physical Laboratory
- British Standard 4200 3
- British Standard 4778 55, 99
- British Standard 5750 22, 99, 104, 109
- British Standard 6001 46, 102
- British Standards Institution 103
- British Telecom 110
- Burn-in 4, 70

- Central Electricity Research Laboratory 64
- Chemical specialties industry 45
- Coal-pulverizing process 4
- Coates Ltd 64
- Codes of Practice 22
- Computer-based technology, introduction of
 - case study 48
 - organizational effects of 49
 - pointers for planning change 50
- Computer programs, 'artificial intelligence' 8
- Computer programs for design safety, reliability and maintainability analysis 36
 - computer programs 36
 - cost considerations 39
- PREDICTOR 36
- Computer software reliability 8, 62
- Computerized automatic inspection of reticles 68
- Computerized line width measuring equipment 70
- Computerized system for component inspection
 - operating experience 47
 - operating principles 46
 - operational benefits 47
- Computerized system for gauge control. *See under* Gauge control, computerized system for
- Computers, fears and misconceptions about 28, 47, 49
- Computers, for improving quality at workshop level
 - computer utilization at workshop level 31
 - defect classification and demerit rating 31
 - evolution of quality systems 31
- Computers, for inspection 91
- Computers, for quality control 27
 - focusing requirements 29
 - usage by British Industry 28
 - use of statistical quality control by British Industry 27
- Computers, for reference files 32
- Computers, use in selection and training of assessors 104
- Consultative Committee for the Definition of the Metre 83
- Consumer relations 32
- Consumer safety 32
- Control parameters 9
- Convention of the Metre 59
- Costs 51
- Cost reduction
 - by computer-based monitoring 49
 - by computerized analysis 39
 - by SQC 27
- Crest and root interference 19

- Data analysis, collection and reporting by computer 28
 - files 32
 - statistical analysis of, to establish control parameters 10, 11
- Defect classification and demerit rating 31
- Defect-free reticles 68
- Degeneration of seeds 12
- Department of Trade and Industry 27, 58, 65
- D.H.S.S. 88
- Documented business management programme
 - application to smaller organizations 79
 - composition of manuals 76
 - concept of system and resource 75
 - documentation of procedures 77
 - documentation structure 75
 - programme administration 79
- DRAM
 - cell 68
 - flow diagram 67
- Dutch Council of Certification 119
- Dutch Normalization Institute 118

- ECA Corporation, Turkey 112
- E.E.C. 13, 104
- Elapsed time meters 6
- Electricity Supply Utility 75
- Electronic equipment, testing of 4
- Element gauging, electronic means of 21
- Employee performance, quality of. *See under* Quality of employee performance
- Experience retention 85
- Experience retrieval 86

- Failure Mode, Effect and Criticality Analysis (FMECA) 36, 37
- Failure rates
 - bathtub curve 4
 - cumulative failure distribution 3
 - exponential failure distribution 3
 - hazard rate 3, 4
 - infant mortality 4
 - of 'artificial intelligence' programs 8
 - of hardware 8
 - of resistors 7
 - of semiconductors 70
 - of software 8
 - mean time between failures 7
 - wear-out failure 7
 - Weibull distribution 3, 38
 - See also* Reliability
- Fault Tree Analysis (FTA) 36, 39

- Feedback, to workers 33
- Finished product quality index 31, 33
- Gauge control, computerized system for
 - availability of outputs and identification codes for 42, 43
 - basic requirements of 41
 - output functions and methods 43, 44
 - special requirement 44
 - system information inputs and outputs 41, 42
- Gauges
 - Conoco (TLE) 20
 - Go/No-go 17, 41, 45
 - Master 21
 - plain plug 41
- Gauging of tapered threads. *See under* Taper screw threads
- General Conference of Weights and Measures (CGPM) 59, 83
- General Foods France, evolution of quality systems in 31
- Government Advisory Council for Calibration and Measurement 59
- Government Chemist 59
- Government involvement in quality 32, 103
- Hardware, failure of 8
- Harvest-freshness 12
- Heuristic systems 8
- High temperature operating life test equipment (HTOL) 70
- Hospital equipment, defects in 86
- Hospital quality assurance. *See under* Quality assurance critical activities
- Industrial quality assurance, relevance to hospitals 84
- Inspection
 - computer-based, of packaging components 46
 - of related variables 9
 - of statistically-based sample 27
 - 100% 27
- Institute of Quality Assurance (IQA) 27, 79, 99, 100, 104
- IQA Northern Process Industries Study Group 28
- Institution of Industrial Managers 27
- International Bureau of Weights and Measures (BIPM) 59
- International Civil Aviation Organization 63
- International Standards Organization 60, 104
- International System of Units 58
- Japan 66, 115
- Johnson Wax 45
- Joint Commission of Accreditation for Hospitals 84
- Josephson junction standards 63
- Lead error tolerances 18
- Learning programs 8
- Lifespan of seeds 12
- Local slope 68
- Loose shoulder fit 20
- Made in Germany*, E.E. Williams 115
- Maintainability analysis 36, 39
- Maintenance policy of power station 4
- Manuals, composition of 76
- Manufacturing and inspection records (M & IR) 86
- Marketing quality. *See under* Quality and competition
- Maximum allowable defect level 32
- Mean time between failures 7
- Mechanical equipment, reliability assessment of 4
- Merchandise Marks Act 1887 115
- Metre, definition of 55, 83
 - international prototype 83
- Metrology 28
 - and colour 64
 - and communications, time and frequency 64
 - and electricity 63
 - and medicine 64
 - and reference materials 63
 - conceptual role of, in QA 55
 - dimensional 60
 - thermal 62
- Ministry of Defence 59, 99, 104, 110
- Moiré technique 60
- Monitoring of moulding machines. *See under* Computer-based technology
- M.S.F. Service 64
- NATLAS 60
- National Engineering Laboratory 59
- National Physical Laboratory 21, 55
 - algorithms and software for dimensional metrology 62
 - and the British National Measurement System 55, 59
 - calibration chains 55
 - colour standards 64
 - fibre-optics 64
 - insulating-materials standards 63
 - international arrangements 59
 - line-width standards 61
 - moiré technique 60
 - reference materials 63
 - use of laser interferometer systems 83
 - voltage standards 63
- National Quality Assurance and Inspection Conference 46
- National Quality Awareness Campaign 103
- National Standards Laboratories 55
- National Weights and Measures Laboratory 58, 60
- Netherlands Railways Ltd, quality control project
 - basic concepts of 119
 - external influences on 119
 - origins and aims 118
 - results of 119
- Neurological pressure release valve 9
- New technology 22, 47, 49, 104
- Packing
 - of components 45
 - of microdevices 68, 70
 - of seeds 15
- Parts-count technique 36
- Patterson grading system 76
- Pharmaceutical industry. *See under* Vendor assessment programme
- Plasma-etching 68
- Plastics injection-moulding plant 48
- Power station, maintenance policy of 4
- PREDICTOR 36
- Pressure release valve, neurological 9
- Pressure relief valve 5
- Productivity 27, 45, 71
- Product quality 71
- Purchasing 27, 95, 96, 97
- Quality
 - and sub-contractors 5
 - assessment systems 96
 - costs 27
 - definition of 55, 106
 - of seeds, definition of 12
 - of worklife 71
- Quality and competition
 - market risk 116
 - marketing quality 115
 - marks of quality 117
- Quality assurance
 - activities and functions of 106
 - consultant 48
 - industrial, relevance to hospital QA 84
- Quality assurance critical activities for hospitals
 - concept of 84
 - general administration 85
 - resources, application and development 86

- Quality assurance standards. *See under* British Standards; Standards
- Quality audit, internal
 - definition of 109
 - developing belief in 109
 - example approaches and results achieved 110
- Quality circles 22, 31
- Quality control, use of computers in 27, 29, 31. *See also* Computers
